

Fleet Safety Program

Customer Training Seminars from Liberty Mutual Insurance

Course Overview

Does your fleet operate safely? Join our Transportation Technical Specialists to learn about a variety of Fleet Safety topics such as:

- Regulation overview to understand FMCSA regulations and the type of fleets/vehicles that are subject to the regulations
- Fleet Safety Program – Key concepts, sample policies, etc.
- Fleet Best Practices
- Understanding and controlling the exposures from non-owned vehicle used for company business
- Developing and documenting the hiring process to address negligent entrustment
- Telematics and Liberty Mutual Managing Vital Driving Performance™
- Liberty Mutual Fleet Toolkits and Resources

Objectives

At the conclusion of this seminar, you will be able to:

- Implement driver selection criteria and process that will reduce exposure to crashes
- Review and modify your current fleet safety program policies to have clear expectations for drivers
- Develop a driver performance monitoring program to identify drivers with behaviors that make them more likely to be involved in crashes
- Review and update your current fleet safety program practices to reduce the potential you are not meeting regulatory requirements for your fleet
- Reduce the exposures from non-owned motor vehicles used for company business

Who Should Attend
